

# BRAINWORKS MEMORY GAME

## Instructions:

- **Laminate the cards and cut them out. Or cut, then laminate!**
- **Play memory: Place the cards face down and work on memory skills by trying to find matching cards.**
- **Once the match has been made: Complete the activity!**
- **Repeat until all matches have been found and completed.**

## Modifications:

- **Each player finds a match and uses the activity as part of an obstacle course. After all matches have been made, each player completes all of the obstacle courses that have been set up. (2 players, 2 courses, 3 players, 3 courses, etc.)**
- **Ditch the matching and have the child pick 3-5 cards (depending on age) and set up an obstacle course to complete.**
- **Instead of matching activity cards together, match colored arrows and work on identifying activities that have the same adaptive response: i.e. "Bouncing on a ball and peanut rocking both make me feel awake."**
- **Match activities to emotion cards. (Join [BrainWorks](#) to access feeling / emotion cards and print / laminate) Have the child pick a card and identify the emotion they feel when completing it.**

# BRAINWORKS MEMORY GAME

**Bounce on ball 10x**

**Crawl forward and backwards 5x**

**2x in each direction**

**Peanut rock 8x**
